SUNBELT SIGN SUPPLY

Wholesale Distributor of Quality Sign Making Materials

Sunbelt Sign Supply, Inc. is proud to offer the following services. Please call our Midland, NC Location at 1-800-230-7668 or Conway, SC Location at 1-888-221-8321 for details and prices. All of the below services are completed in house at the Midland, NC branch. Finished products can be transferred on our trucks twice a week for your convenience. Our experienced staff is committed to providing accurate and timely service. Your success is important to us, and we look forward to servicing your individual needs. Your confidence in Sunbelt Sign Supply's ability is greatly appreciated.

Routing

Sunbelt Sign Supply offers routing services to our customers. Let us help you with all those odd shapes or routed acrylic lettering. Please give us a call and we will send you a simple form to complete and return with your information. A Sunbelt representative will get back to you promptly with a quote and an expected delivery date.

Saw & Shear Cutting

In a hurry and no time to cut your substrates to size? We offer custom cutting of the substrates that we sell to you. Your cuts can be completed by a saw or shear. Simply tell us the exact sizes you need when you order material, it will be delivered next day. Our charges for cutting are fair and extremely reasonable. For large cut orders, extra time may be needed.

Corner Rounding / Holes

Do you need the corners of your sign blanks rounded? We can take care of that for you as well! We offer radius corners in the following sizes: 1/2", 1", 1-1/2". Mention that to us when you place your next order for Aluminum, Aluminum Composite, and PVC.

We also have the ability to drill holes in blanks, call today for details.

Acrylic Fabrication (Laser Cutting)

Let us Laser Cut that special acrylic job for you, Give us a call at 1-800-230-7668 to get more details and pricing.

Air Channel Wrapping Films

Avery Dennison®
Supreme Wrapping™ Films

Supreme Wrapping™ Films

Combining performance, versatility and convenience, these multi-layered films incorporate color and clear protective layers. They provide a smooth, attention grabbing finish that's both durable and dazzling.

Film Type	Cast vinyl
Adhesive	Long-term removable
Liner	Easy Apply RS™
Conformability	Compound Curves & deep recesses

Nikkalite Flexible Engineer Grade Reflective

Nikkalite™ Brand 48000 Series Flexible Engineering Grade (ELG) retro-reflective sheeting is a product manufactured for use as fleet markings, vehicle markings, stickers, decals, etc. which can be screened with multi-colored inks that will adhere very well to this sheeting. Coated with a pressure sensitive adhesive protected with an easily removable liner, this sheeting is easy to handle because of its great flexibility and is capable of giving high retroreflectivity. Best results are obtained when applied to flat surfaces, but it can be applied successfully to corrugated surfaces. It is also used on commercial signs and various labels and highly resistant against the extremes of hot, cold, dry, and humid weathering conditions.

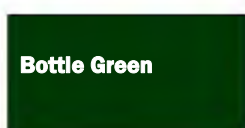

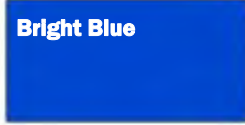

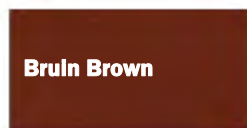

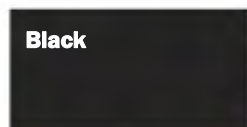

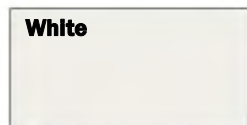

All are available in sizes:	
15" x 50yd	
24" x 50yd	
30" x 50yd	
48" x 50yd	

Avery 800 Premium Translucent

Avery Graphics PR 800 Premium Cast Translucent intermediate films are flexible translucent cast vinyl films which are designed for non-specified computer-cut graphic applications including internally-illuminated signs and awnings. Excellent cutting and weeding on computer sign making equipment, and adhesion to a wide variety of properly prepared substrates. Should be applied to flexible backlit scrim, glass, polycarbonates, and acrylics. 3.0 mil film. Durability: Up to 6 years.

Light Control Vinyl

Manufacturer	Product	Description	Roll Sizes
	Avery Light Control Diffuser 	A cast diffuser film with permanent adhesive designed to diffuse light when applied to both flexible and rigid substrates. 5 year durability	15" x 10yd 15" x 50yd 24" x 10yd 24" x 50yd 30" x 10yd 30" x 50yd 48" x 10yd 48" x 50yd
	3M Diffuser Film 	These films provide light diffusion when applied either first or second surface to internally-illuminated signs. This film may also be thermoformed and is uniform in both reflective and transmitted light. 5 year durability. Available in either 30% or 60% diffusion. Please specify preference when ordering.	48" x 10yd 48" x 50yd
	Avery Light Control Blockout 	A cast blockout film providing a complete light blocking barrier. 5 year durability. Available in White or Black. Please specify preference when ordering	15" x 10yd 15" x 50yd 24" x 10yd 24" x 50yd 30" x 10yd 30" x 50yd 48" x 10yd 48" x 50yd
	3M 3635 Blockout Film 	These films are intended for blocking out light when applied either first or second surface to internally-illuminated signs. 5 year durability. Available in two finishes 020 (3M 20b) white face with black back and 022 (3M 22b) black face with white back. Please specify preference when ordering.	48" x 10yd 48" x 50yd
	3M 3635 Dual Color Film 	These films are used to create the special effect of a color/image by day (non-lighted) and a different color by night (backlit). This is achieved when a background color/image glows through the perforations in the dual color film. From a typical viewing distance for large format graphics, viewers will notice little or no perforation pattern. Dual color films are available in black 222 or white 210 with a 5 year durability. Please specify preference when ordering.	48" x 10yd 48" x 50yd
	3M 3635 Light Enhancement Film 	This film is designed to reflect light increasing light output for greater sign luminance when applied to the inside of internally-illuminated cabinets or channel letters. This product is color number 100PM and comes with premasked by 3M 5 year durability. Matte white finish.	48" x 10yd 48" x 50yd

Siser Heat Transfer Vinyl

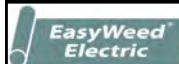

The most trusted Heat Transfer Vinyl in the world!

Applies at a lower temperature than competitor material, backing can be peeled hot or cold and doesn't lift during weeding. It's also extremely durable wash after wash and uses a lower pressure setting for application. EasyWeed® is thinner than others on the market and offers a one=second tack application that's great for multiple layers. EasyWeed® has a pressure sensitive carrier that allows you to offer detailed designs on a wide variety of fabrics. EasyWeed® can be cut with laser cutting systems.

Flexible style with performance wear and more!

Performance wear has met its match! EasyWeed® Stretch by Siser delivers all the benefits of our EasyWeed® heat transfer material and combines it with super stretchability to create one remarkable heat transfer material! The thinnest of any Siser material, EasyWeed® Stretch has an ultra-matte finish and a soft hand that's available in 20 popular colors, including sweet mint and coral. While EasyWeed® Stretch is ideal for performance apparel, the soft hand and light weight often make it a favorite for other garment decorating.

Electrify Your Look with Unique Finishes!

If you're looking to take your designs to the next level, EasyWeed® Electric has a finish or pattern just for you! You've never seen a heat applied material like EasyWeed® Electric. The colors are vibrant with a pearlescent metallic sheen. EasyWeed® Electric comes on a pressure-sensitive carrier which makes cutting detailed designs and logos a breeze. EasyWeed® Electric is durable wash after wash and maintains its bright color and brilliant finish. If you're looking to provide multi-color designs, EasyWeed® Electric can be layered.

Metallic Look with a Super Soft Feel!

Due to EasyWeed Foil's pressure sensitive carrier, you can heat the platen and weed the design on the heated surface for smooth weeding!

Make Your Designs Shimmer and Sparkle!

VideoFlex Glitter Heat Transfer Vinyl is a fashionable alternative to Glitter by Siser. VideoFlex Glitter is specially constructed to be soft to the touch

Sub Block has Dye Migration Covered!

Especially formulated to block all dye migration and leave you with an awesome looking jersey! Even through wash after wash the color stays vibrant EasyWeed Sub Block is ideal for the popular digital camo and motocross jerseys!

Sister's Easiest Weeding Reflective!

EasyReflective is Siser's only reflective material with a pressure sensitive backing! This reflective heat transfer illuminates in dark.

Glitter

Attractive Design with Eye Catching Sparkle!

Bling out plain designs for maximum appeal with the best Glitter HTV on the market! Available in over 30 vibrant colors, Glitter contains maximum sparkle without shedding any glitter flakes. Kids of all ages love the shimmer and pop, and since it's CPSIA Certified it's safe to apply on kids clothing. But did you know you can also sublimates directly onto white Siser Glitter!? Check out our website for a video!

A New Dimension in Heat Transfer Vinyl!

Holographic contains color changing chips that create the effect of depth and dimension. Available in many special effect colors and finishes, Holographic will take your designs to a new level. Love the look of rhinestones but don't want to go through all the hassle? Holographic can be cut to look exactly like rhinestones, without having to go through all the extra work associated with applying rhinestone designs. The Holographic line also features our Pearl material. Pearl is unlike any other material, giving your designs an opalescent finish.

The Only Flock in the Industry that can be Layered On Itself!

A great alternative to embroidery, *StripFlock* heat transfer vinyl gives logos a raised, textured, suede-like feel. The deep, opaque colors make *StripFlock* excellent for retro designs or anytime you want a rich look. *StripFlock* looks excellent on caps, bags, and garments that need textured visual interest. Use *Stripflock* as a base layer and cover with other materials or more *StripFlock*! The ability to layer this material allows you to say "yes" to multi-color designs.

Our Thickest Heat Transfer Vinyl

Our Thickest Heat Transfer Vinyl – Now Easier to Cut and Apply Thin or thick, materials of all sizes have a place in garment decorating! Siser Brick 600 is a 600 micron thick, flexible heat transfer vinyl that's designed for smaller logos and designs to add extra dimension to your garments. Brick 600's semi-gloss finish looks great on caps, bags, and is ideal for left chest logos. Next time you feel your design is just too flat, consider giving it some dimension with Brick 600 by Siser!

Reflect Light and Stay Insight

ReflectAll by Siser is a highly reflective heat transfer vinyl that offers great visibility in low-light conditions. Perfect for road workers, construction crews, delivery drivers and runners / bikers that are active when the sun goes down. *ReflectAll* is a truly remarkable polyurethane reflective product that has a higher reflectivity due to its patented glass bead construction. Want to try something truly unique? *ReflectAll* can be layered for multi-color reflective looks!

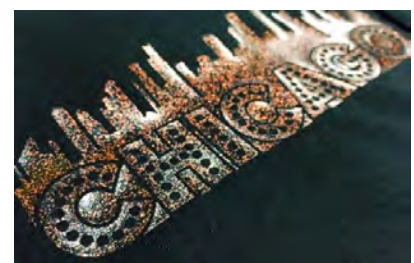

Specialty Materials™
THE BEST GARMENT DECORATION PRODUCTS

ThermoFlex[®] PLUS

ThermoFlex[®] Plus is a durable polyurethane based material that is highly flexible. It has a soft hand and strong grip and if applied properly will outlast the life of the garment.

ColorPrint™
PU Matte

ColorPrint™ PU Print and Cut Material

Print and Cut Full-Color Designs with Incredible Stretch & Rebound. Impress your customers with beautiful, vibrant graphics that are also lightweight and durable. Siser's ColorPrint PU is a thin, stretchable print and cut material available in a glossy or matte finish. Compatible with eco-solvent, solvent, and latex based printers/cutters, ColorPrint PU creates great full color graphics. ColorPrint PU is thin enough to provide a great hand and stretchable enough for most performance wear. Plus it's easy to use! Just print, cut, mask, and press! Semi-Gloss or Matte

ColorPrint™
Extra

ColorPrint™ Extra Print and Cut Material

The Print and Cut Material for Difficult to Print Items! ColorPrint Extra is a white print and cut material that is perfect for full-color printing on nylon and is durable enough for pennants, canvas, tents and other difficult to personalize fabrics. Glossy print and cut material that works on shoes, belts, canvas bags and more. Compatible with eco-solvent, solvent, latex, and thermos-resin inks and printers. ColorPrint Extra is the durable alternative to costly screen printing on oversized or odd substrates.

20" or 29.5" x 50yd

ColorPrint™
Soft 2.0

ColorPrint™ Soft 2.0 Print and Cut Material

Siser's Thinnest and Softest Digital Material! ColorPrint Soft 2.0 is a clear print and cut material ideal for white or light colored fabrics. Use your eco-solvent or solvent inks to print bold graphics that are soft to the touch. Thin and lightweight, this is the closest look and feel to screen printing among digital transfer materials. Additionally, ColorPrint Soft 2.0 is simple to use because it does not require a mask. You simply print, cut, weed and heat apply. Simplicity and soft hand in one printable material.

20" or 29.5" x 5yd

ColorPrint™
Sublithin™

ColorPrint™ Sublithin Print and Cut Material

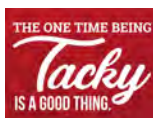

The Perfect Print and Cut Material for Sublimated Sports Garments! Standard print and cut material isn't formulated for use on sublimated jerseys. Dye migration is when the sublimation inks bleed through the vinyl, causing your designs to look muddy or splotchy. ColorPrint Sublithin is specially formulated to work with most eco-solvent and solvent based inks and printers to block this dye migration and keep your graphics looking sharp on any kind of sublimated polyester garment! Great for all polyester motocross, soccer and hockey jerseys with full sublimation.

20" or 29.5" x 5yd

20" or 29.5" x 25yd
54" or 59" x 25yd

TTD
Easy Mask

TTD Easy Mask

Most application tapes in the industry are manufactured to transfer sign vinyl which doesn't require heat. When using these tapes to apply Siser products, you may be left with an adhesive residue. Additionally, the tape may be difficult to remove which slows down the production process. An extended amount of time was spent formulating a transfer tape that works perfectly with our heat transfer materials. This CLEAR mask allows you to accurately place the image on the garment then releases easily after heat application. Combine TTD Easy Mask with Siser Print and Cut Materials for the best application results.

20" or 29.5" x 5yd
20" or 29.5" x 10yd

20" or 29.5" x 25yd
20" or 29.5" x 50yd

54" or 59" x 50yd

TTD
High Tack Mask

TTD High Tack Mask (Formerly Evolution Mask)

TTD High Tack Mask is specifically designed for ColorPrint Soft Opaque to transfer images perfectly every time. The increased tack allows the transfer tape to firmly grip the print and cut material, which prevents wrinkling and warping, during the masking process. A warm peel keeps the application process quick and simple so you can create more products faster. TTD High Tack is clear and thin, so you can accurately place the material on the garment. Use TTD High Tack Mask in conjunction with ColorPrint Soft Opaque for the best application results.

PRINTED FABRICS DRAW CROWDS, BUILD BRANDS, CREATE BEAUTY.

Retailers looking for an edge in the marketplace need look no further than printable fabrics. Inkjet and digital printing technology results in vivid colors and fine details in custom designed formats. With fabric as the base, the results are eye catching and compelling, helping to generate traffic, build brands and add beauty. Media fabrics must follow strict environmental standards for use indoors, and Glen Raven offers fabrics that meet these requirements.

JET UP BC

JET UP BC is an eco-friendly fabric from the EverGreen Fabrics range that is flame retardant, opaque, bi-colored (top side white/reverse side grey) and printable on 1 side by digital printing using solvent, UV or Latex inks. JET UP BC is lightweight, finely textured, and no-curl. It is self-supporting and well suited for use in displays, roll-ups, kakemono, point of sale displays and wall covering.

Sizes: 36" x 164ft 54" x 164ft
42" x 164ft 126" x 164ft

Vivitex

Vivitex sign and banner fabrics deliver incredible depth of color and detail, featuring a matte finish for a soft finish. These fabrics are great for both indoor and outdoor applications, including but not limited to banners, outdoor patio umbrellas, fabric awnings, backdrops, sales promotions and promotional bags.

Tacky Apparel Paper (TPTKY)

Thermo-Tack (Tacky Apparel Paper) provides a unique print medium engineered solely for apparel sublimation transfer applications. A tacky super-uniform coated print surface activates during the transfer process. Thermo-Tack paper maintains sharp definition even at heavy ink loads. It adheres to more polyester textiles and has a high transfer yield.

Sizes: 44" x 275 Ft
64" x 373 Ft

TexPrint Supreme Thermo Tack (TPSTT)

The next generation of thermo-tack sublimation transfer paper by Beaver Paper. Weighs in at 92gsm for ease of handling through calendar hear presses. The super-uniform coated print surface has been re-imagined, delivering improved consistency and high fluid capacity.

Sizes: 64" x 492 Ft

TexPrint XP-HR Plus Sublimation Paper (TPXPt)

TexPrint XP-HR Plus is a 140gsm digital sublimation paper designed around the Mimaki JV5-320 printer. Designed and compatible with the newer high speed inks and piezo print head technology. The high re-release characteristics of this paper allows for superior color density transfers while reducing ink loads. Small format, high release quick-dry water based sublimation paper.

Size: 24" x 250 Ft

TexPrint UT Sublimation Paper Utility Textile

The advanced coating chemistry of TexPrint® UT provides a unique lightweight print medium engineered for newer high-speed digital sublimation printers and a proprietary coating chemistry with light tack giving customers confidence during transfers. The coating also provides fine detailed definition with smooth gradient transitions. High yielding rolls.

Size: 64" x 575 Ft

TexPrint XPHR Sublimation Paper

TexPrint XPHR is a Large Format 'High-Release' Quick-Dry Water Based Sublimation Paper. The only 'hybrid' paper that can be used for both hard and soft substrates. One multi-purpose product is perfect for distributors and end-users alike.

Size: 64" x 393 Ft

ProTex Tissue Paper

ProTex High-Yield Protective Tissue for Dye-Sub Heat Calendars. It is a high density, highly formed natural eucalyptus fiber sheet, providing the highest yield and the strongest barrier properties. 3 inch core.

King Colorcore

King ColorCore is a versatile, environmentally stabilized sheet with multiple layers of contrasting colors. Its thin cap layers and bright primary colors make it ideal for signage applications. For maximum versatility, standard colors are made to coordinate with King ColorBoard. King ColorCore is easy to engrave and machine, as the cap is approximately .050" thick.

Duna-USA High Density Urethane

HDU is an innovative polyurethane substrate used for a variety of signage applications. It has excellent grain-free consistency and excellent workability. HDU can be cut with almost any type of tool. Its closed cellular structure and absence of fibers or granular structure result in crisp, excellently defined edges after fabrication. It is also impermeable by any type of liquid, including water solvents, making it much better suited for severe weather conditions or harsh marine environments than many other materials. 15 lb

Hartco Sandblast Stencil - 900 Series

The 900 Series SandMask is a unique blend of the characteristics of our most popular 400 Series and our most pliable and blast resistant 500 Series polymeric vinyl. This **new formula** creates the toughest, most flexible, and versatile stencil that we have ever developed! The 930 is cast to a total thickness of 30 mils. The fully cured vinyl is combined with our proven Regular Grip or High Grip Adhesives, comes on a plastic liner, and in both punched and unpunched. **The 930 has all the pliability and toughness of rubber without the powdery residue, distortion of image, and other detriments. This product solves all your "rubber resist headaches" while still providing what you love most!**

Primed MDO Plywood

Pre-primed MDO is primed MDO overlaid, two step plywood which provides an excellent base coat for over coating. Smooth surface for high quality enamels. Pre-primed save time and labor. Superior surface and life. Waterproof bond for water/high humidity resistance. High face/edge screw holding. Very low formaldehyde. Applications: exterior signage and billboards, furniture, cabinets, displays, fixtures, shelving, partitions, soffit, fascia, sports sideboards, and more.

1/2" Thick Primed 2-sided / Good 2-Sided 48" x 96"

Primed

Painted MDO Plywood

Prefinished, satin gloss MDO plywood ready for wide layout digital printers, vinyl letters & paints. It has a 2 year limited warranty against flaking & peeling. Features and Benefits: Economical, high gloss finish Ready for vinyl letter, digital print & paint. Excellent scratch & mar resistant. Superior weatherability. Very low formaldehyde; meets CARB

1/2" Thick Painted 2-sided / Good 2-Sided 48" x 96"

Painted

Unprimed Plywood

Unfinished, paint grade raw MDO. Good 2-Sided. Excellent paintability and long lasting painted surface. High quality plywood substrate providing superior machineability and screw holding. Water and humidity resistant. No added urea formaldehyde, meets CARB

3/4" Thick Raw 2-Sided 48" x 96"

Raw

Extira®

Extira® is a green panel product that resists moisture, rot, and termites. It offers excellent performance in exterior environments. Extira® panels can be used in any non-structural paint grade EXTERIOR application. They also work well for high moisture interior environments. Has a 5 year warranty, and is unprecedented in the product category.

Ultra Mount

Ultra Mount is a favorite for mounted digital graphics and is often used for in-store décor and exhibits. It is a heavy-duty board with 18-pt poly-coated paper liners perfect for laminating, dry mounting, cold mounting, screen printing, paints or vinyl.

Ultramount panels are lightweight but durable and will not warp or bow. The coated surface lets you reposition a print or vinyl lay-up without damaging the paper liner.

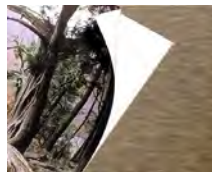

Thickness	Available In	Size
3/16"	White Black	48" x 96"
1/2"	White Black	48" x 96" 60" x 120"

Ultra Mount Peel & Stick

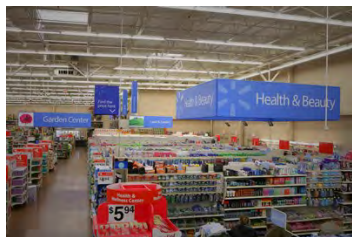

Ultra Mount also comes in Peel N' Stick versions for convenience and simplicity. Ultra Mount Peel N' Stick comes coated on one side with high tack pressure sensitive adhesive. These are ideal for mounting a variety of materials including computer-generated digital graphics, photographic papers, prints, artwork, posters, drawings, charts, and virtually any type of paper or plastic.

Thickness	Available In	Size
3/16"	White Black	48" x 96"
1/2"	White Black	48" x 96"

Ultra Board

Ultra Board is a Heavy duty, all-plastic panel that features a litho-grade, high-impact polystyrene surface perfect for screen printing and digital printing. It is ideal for permanent displays and signs. Designed for interior use and is favored for its durability.

Thickness	Available In	Size
3/16"	White Black	48" x 96"
1/2"	White Black	48" x 96" 60" x 120"

Ultra White DP

Ultra White DP is a lightweight, heavy-duty brite white 18 point poly-coated kraft paper lined foam board with a dense extruded polystyrene foam core. Designed to be used with flatbed printers. Its bright white liners show exceptional image quality. Ultra White DP is versatile, easy to use and easy to handle.

Thickness	Color	Size
3/16"	White	48" x 96"

Ultra Core

For temporary or light-duty uses. Ultra Core is rigid and smooth, and easy to cut with a utility knife, razor or die. Ideal for mounting and framing photos and prints, and also works well for screen printing, temporary signs, architectural models, promotional displays and point-of-purchase sales.

Thickness	Color	Size
3/16"	White Black	48" x 96"

Ultra Aluminum

Ultra Aluminum is the ideal material for decorative letters, and logos, often see in hotels, banks and office buildings. It can be sawed or routed, and is easier to craft than solid metal. It even maintains its appearance better - the surface is anodized aluminum which will not rust, fade or tarnish.

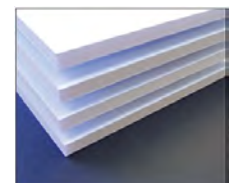

Thickness	Color	Size
1/2"	Polished Gold Brushed Gold Chrome	48" x 96"

INSITE® REVEAL® Foamboard

Paper-faced memory foamboard with the proprietary Reveal® foam center. Engineered to retain its thickness during mounting, laminating, screen-printing and die-cutting. Highly warp resistant. Smooth bright-white clay coated paper or black paper. White liners offer heavier surface coating to promote superior ink holdout and excellent color gloss. The coating acts as a barrier to minimize adhesive absorption while maximizing mounting and laminating speeds.

Thickness	Color	Size
3/16"	White Black	48" x 96"

Beveled Frame Post & Panel

Beveled Frame Sign Kits - A combination of extruded aluminum post and interlocking Beveled Frame that will accept a 3mm (1/8") Aluminum Composite Board. Industry unique design allows for a wide range of panel material up to .25"

Single Post Flag Mount

- Standard 3" post design & cap
- 7'6" Post length
- Paint (1) standard color

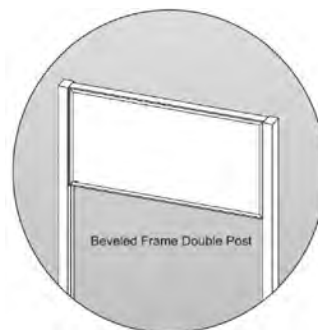

Optional

- Additional post length
- 6" Post designs
- Custom color
- Base plates 6"x6"; 8"x8"; 12"x12"

Double Post Flag Mount

- Standard 3" post design & cap
- 7'6" Post length
- Paint (1) standard color

Optional

- Additional post length
- 6" Post designs
- Custom color
- Base plates 6"x6"; 8"x8"; 12"x12"

Wall Directory System

The Wall Directory System is a thin profile, easily changeable wall directory system. It consists of a 1-5/16" deep frame that holds up to 1/8" material and integrates H-bar for separating the individual panels. The side is easily removed via countersunk hardware and the panels can be slid out and easily serviced.

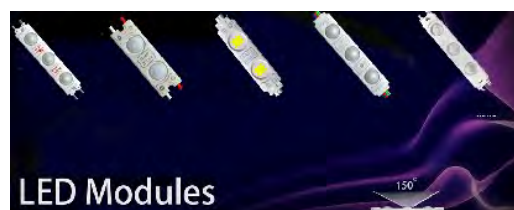

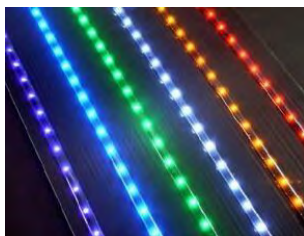

As pictured, custom shaped tops can be integrated into the system to meet your design needs.

Think outside the box and use this system for integrating a multi-tenant system onto an existing post and panel or monument sign.

Mutoh 54" ValueJet 1324X Printer for Durable Graphics

The ValueJet 1324X– 54" Eco-Solvent printer's small footprint, standard features and production capability make it ideal for any size shop, including a take-up system, two year warranty and Smart Printing features, the 1324X offers a much better value for your money.

- Compact size silent operation, perfect for any workspace
- High Productivity - Speed up to 565 sq. ft. per hour in production mode
- Best in class quality allowing for 6 color output with a four color single head
- Low maintenance / easy to install, operate and maintain
- Three Heater Design for fast drying
- Affordable retail price
- Two year On-Site Warranty

Mutoh 64" High Quality ValueJet 1624X Printer for Durable Graphics

The ValueJet 1624X– 64" utilizes a state-of-the-art four color print head and Mutoh's DropMaster technology, that ensures the most accurate dot placement, giving you the highest quality prints every time. The 1624X prints up to 600 sqft/hour, giving you a significant boost in capability.

- Commercial Grade Construction
- High Productivity - Print speeds up to 600 sqft/hr.
- Best in class quality allowing for 4 color output with a four color single head
- Low maintenance / easy to install, operate and maintain
- 3 years outdoor durability without lamination, 5 to 7 with lamination
- 220ml / 440ml ink cartridges and 1 liter ink bags with optional bulk ink adapter
- Three Heater Design for fast drying
- Two year On-Site Warranty

Mutoh 64" High Speed Sign Printer for Top Quality Outputs

Mutoh's ValueJet 1638X high speed, eco-solvent printer has a staggered dual-head design that blows the competition away! With print speeds over 1,000 sf/hr no one comes close to its production capability. And with Mutoh's Smart Printing technology like; Intelligent Interweave (i2) print technique that virtually eliminates banding, ColorVerify for process control, ValueJet Status Monitor (VSM) an app for remote printer monitoring and an optional on-printer SpectroVue VM-10 spectrophotometer for easy profile making the 1638X is the smart choice for today's serious print professional.

- Dual staggered print heads for increased productivity and speed
- High speed perfect for high volume banner printing
- Now comes standard with a rear media feed lever for easy loading and unloading of roll material
- CMYK x 2 / CMYK Lc, Lm, Lk
- Three Heater Design for fast drying
- 3 years outdoor durability without lamination, 5 to 7 with lamination
- One year limited On-Site Warranty

Mutoh 64" ValueJet 1617H Hybrid Printer

The ValueJet 1617H is the most affordable hybrid printer on the market. It not only gives you the ability to print on rigid substrates, it also gives you the flexibility to print on roll media as well. Its dual function and multiple application design saves you valuable floor space and is ideal for printing packaging prototypes, trade show graphics, POP displays, indoor and outdoor signage, even vehicle wraps. The 1617H also comes with Mutoh's VSM app for remote printer management, a half inch print height, faster speeds and ability to print white ink makes the VJ1617H a smart choice for all your printing applications,

The ValueJet 1617H reaches hard printing speeds up to 300 sq ft an hour in production mode, but you also get a printer that you can use for both car wraps and rigid substrates with equal ease. Mutoh's new ValueJet 1617H prints directly onto corrugated plastics, polystyrene, pvc, acrylic, polycarbonate, foam board, aluminum composite, banner material, vinyl, wall coverings and more.

UV Alternative Bio-Based Ink. Not only does MP Ink give you high performance on rigid substrates, it also prints beautifully on roll surfaces with an exceptionally wide color gamut.

- ◆ Print speeds up to 300 sq/ft/hr in production mode
- ◆ One year limited on-site warranty
- ◆ Print on rigid or flexible substrates with equal ease
- ◆ Built in spectrophotometer for optimum color reproduction
- ◆ Utilize Mutoh's patented Intelligent Interweave i2 print technology to virtually eliminate banding.
- ◆ Print beautiful high-quality prints with all new multi-purpose MP Ink
- ◆ Enjoy an affordable alternative to UV printing that produces breathtaking prints
- ◆ Half Inch Print Height. Printing prototype packaging and mock up displays have never been easier.
- ◆ White Ink Capability. The ValueJet 1617H allows you to print using white ink which gives you even greater print capability by allowing you to use material like plexi, cardboard, glass and black foam board.

Mutoh ValueCut High-Performance Cutting Plotters

The ValueCut line of cutting plotters are ideal for home, office and professional users providing the finest cutting quality with unsurpassed tracking capabilities. Choose from one of three models to suit your needs, VC-600 (24" Cut width), VC-1300 (52" cut width) or VC 1800 (72" cut width). All models come standard with a roll support system for easy handling and perfect tracking and multi-segment registration for long run cut job accuracy. The VC-1300 and VC -1800 models also come with a floor stand and media catch basket, which are both options on the VC-600 model. For price, performance, quality and service the ValueCut is the smart choice for cutting plotters.

- Traditional vinyl cutting for lettering jobs
- Contour cutting of pre-printed stickers
- Cut through feature for the creation of individual stickers
- MUTOH EDITION FLEXISIGN AND PRINT

Features:

- 24", 52" and 72" cutting plotters
- Versatile roll support system allows for perfect tracking
- Contactless loading of pre-printed rolls
- Intuitive job recognition and alignment of contour and cut data
- Multi-segment registration capability for accurate long run cut jobs
- Catch basket included on VC-1300 and VC-1800 models

ValueCut are available in three models to match the most common needs:

ValueCut 600 – maximum media width of 24"
ValueCut 1300 – maximum media width of 52"
ValueCut 1800 – maximum media width of 72"

Max CPM-200GU - 8 Inch Wide + 4 Color Process Printing & Cutting Machine

Meet your sign and label needs in real time, by printing in-house with the MAX Bepop CPM-200GU printing system. It can print in vivid full-color using four specialized process color ink ribbons (Cyan, Magenta, Yellow, and Black). For the first time you can print and cut combinations of photos, illustrations and text all on the same 8 inch wide vinyl.

Max CPM-100G3U - 4 Inch Wide Printing & Cutting Machine

The MAX Bepop CPM-100G3U has virtually limitless applications and is used by companies all over the world! From high schools and train stations, to factories and space programs, everyone has found a use for our custom marking system. The MAX Bepop system combines a high precision cut-rotor with durable thermal printing technology. In other words, it cuts and prints your design perfectly!

Graphics Tracer Professional Program

Getting scanned or imported logos into shape can be a hassle. Most people working with graphics agree that poor quality, low-res images will result in unprofessional finished products no matter which tracing program you use. For many, the only option to get good looking graphics was to redraw everything manually.

Graphic Tracer can restore graphics in minutes and make them look perfect!

WIDE FORMAT LAMINATORS

Easymount Air 1600 Single Hot Laminator

The award-winning Easymount Air is a revolutionary product in the wide format lamination & mounting market. Great for making signs and finishing prints.

Key Features

- ◇ Pneumatic air pressure
- ◇ 10m/33ft a minute
- ◇ 30mm/13/16" mounting thickness
- ◇ Variable speed control
- ◇ Foot pedal
- ◇ Reverse Mode
- ◇ Multilingual control panel
- ◇ Maximum Width: 63"
- ◇ Mounting Thickness: 1"
- ◇ Warm-up time: 10 minutes
- ◇ Digital Control Panel
- ◇ 1 Year Warranty

Ideal When Laminating:

- ◇ Mounting prints to board
- ◇ Pop-up displays
- ◇ Applying vinyl, tapes and adhesive film
- ◇ Outdoor signage

Pneumatic air pressure controls the laminating rollers, allowing you to mount and laminate with incredible accuracy and speed.

Easymount 1400 Single Hot Laminator

Easymount is designed to perform and built to last. Great for making signs and finishing prints.

Key Features

- ◇ 6m/20ft a minute
- ◇ Maximum Width: 55"
- ◇ Multilingual control panel
- ◇ Variable speed control
- ◇ Foot pedal
- ◇ Reverse Mode
- ◇ 1" Mounting Thickness
- ◇ Warm-up time: 10 Minutes
- ◇ 1 Year Warranty

Ideal when laminating:

- ◇ Mounting prints to board
- ◇ Pop-up displays
- ◇ Applying vinyl, tapes and adhesive film
- ◇ Outdoor signage

The Easymount laminator is designed to perform and built to last. The advanced features allow you to laminate and mount. Designed in-house by Vivid, the Easymount gives your business extra capacity by allowing you to offer your customers a complete service that you previously had to outsource.

Easymount 1600 Cold

Easymount is designed to perform and built to last. Great for making signs and finishing prints.

Key Features

- ◇ 6m/20ft a minute
- ◇ 25mm/1" mounting thickness
- ◇ Variable speed control
- ◇ Foot pedal
- ◇ Reverse Mode
- ◇ Multilingual control panel
- ◇ Maximum Width: 63"
- ◇ 1 Year Warranty

Ideal When Laminating:

- ◇ Mounting prints to board
- ◇ Pop-up displays
- ◇ Applying vinyl, tapes and adhesive film
- ◇ Outdoor signage

Heat Press Machines

DIGITAL KNIGHT DK16 - 14 x 16 AND DK20 - 16 x 20 DIGITAL CLAMSHELL

FEATURES

- ◆ Fully digital temperature control 32°-600° F range
- ◆ Automatic digital timer & dual pre-press timer
- ◆ Super-portable light machine
- ◆ Interchangeable tables
- ◆ User selectable end-of-cycle alarms
- ◆ Teflon-coated 3/4" thick heat platen

The DK16 is a mid-sized clamshell, the 14 x 16 opens to full access to lower bottom table. This is the lowest cost solution for a business grade heavy-duty heat press. Operators are able to slide shirts over table with complete drape space around and underneath the loading area. The DK20 has the same features in a larger size of 16" x 20". Also, the DK20 can be upgraded to a twin station.

Banner Hemmer

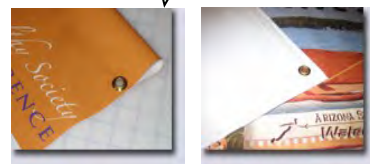

BannerPRO Professional Banner Hemming System

BannerPro is a professional thermal hemming system that welds hems into banners without the use of thread or double sided tape. It uses a 24" wide thermal fusing element and helps you to easily create banner hems, pole pockets and pocket signs. For long hems, the BannerPro accommodates a step and repeat method and a trough to help hold the rolled up banner. Each 24" section is fused in 5-7 seconds.

FEATURES

- Hands free, foot pedal operation
- Consistent seals
- Heavy-duty construction
- 110v-120v operation
- Only gets hot when peddle is pressed
- 24" seal length

Corner Rounders

Lassco CR-20 Desktop Corner Cutter

Model CR-20

- Designed to handle paper and plastic products
- Handles up to a 1/2" of stock per cut
- Shear action cutting
- Table Size: 5" x 10 1/2"
- Unbreakable top-plate

Lassco CR-60 Corner Cutter

Model CR-60

- Designed especially for the sign industry
- One ton press capacity
- Shear capacity of up to .080 half hard aluminum
- Interchangeable tables for quick changes of radius sizes
- Four table sizes available (1/2", 3/4", 1", 1-1/2")

ReelPRO™

ReelPro is an affordable, easy to install, easy to use take-up system which will allow you to take control of your workflow. Providing superior performance and reliability, ReelPRO will immediately start saving you money through improved efficiency when printing longer jobs: banners, vehicle wraps, wallpaper, signs, etc.

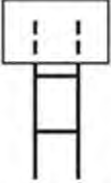

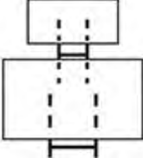

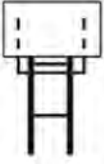

*Some printer models may require an additional mounting bracket kit

FEATURES

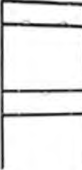

- ◆ Unattended printing
- ◆ Avoid dust and dirt on printed images
- ◆ Eliminated waste through workflow
- ◆ Stop kinking and scratching prints as they are moved from the printer to your work table, or as they hit the floor
- ◆ Improve your profitability through increased efficiency

PVC - Post and Rail Kits

Premier

The Premier Sign Frame is the flagship of our framing lineup and a great selection for larger frames with visual aesthetics. The horizontal members are a unique "T" rail design that add elegant detail to your sign's border. These Frames add curb appeal with maintenance free benefits. Here are some other features of the Premier Sign Frame.

- 4" x 4" posts & decorative "T" rails
- Strong "Joint Peg" assemble system adds extra decore at the corners of the frame
- 8' posts can install over wooden 4" x 4"s or planted directly in the ground
- Holds full size substrate (up to 4 Ft x 8 Ft 12mm thick)
- Substrate sold separately
- Available in White or Beige

Sizes: 36" x 48" 48" x 48" 48" x 72" 48" x 96"

Single Arm

The Single Arm is a traditional design that gives you the ability to easily change your sign and your location. These are ideal for real estate, directional, or small business signs. It also includes upgrades such as the Post Stake for easy installation, decorative Gothic Cap, and two Rider Clips for optimal utility, and all the necessary installation hardware. The single Arm can be removed and reinstalled just as easy.

- Available in 54" height with 32" arm
- Pre-fabricated for quick and easy installation
- Designed for various "hook" locations to hang signage
- Stainless steel hardware ensures against rust and corrosion
- Substrate sold separately
- Available in White or Beige

Standoffs

Classic Standoffs

These stand offs are constructed from aluminum giving you the option to use them indoor or outdoor. Simply attach the fasteners to a wall using the provided screws and wall anchors. Once in place, mount your panel on the standoff and hand-tighten the threaded cap. Individually rated for up to 65lbs each, this means that no matter the job, these standoffs can support the weight.

Comes with Cap, Barrel, #6 x 1 1/4" screw and drywall anchor.

1" D x 2"

Satin Silver

Contemporary Standoffs

Constructed from aluminum, these standoffs give you the option to use them indoor or outdoor. Simply attach the fasteners to a wall, using the provided screws and wall anchors. Once in place, mount your panel on the standoff and hand-tighten the threaded cap. Individually rated for up to 65 lbs each. Also great for multiple substrate mounting. Available in Natural or Chrome Finish.

Comes with Cap, Barrel, #6 x 1 1/4" screw and drywall anchor.

1/2" D x 1/2"

3/4" D x 1"

1/2" D x 3/4"

1" D x 1/2"

3/4" D x 3/4"

1" D x 1"

Tamperproof Standoffs

Tamperproof sign fixing is a necessity whenever signage needs to be mounted in public settings such as schools, public transit stations, offices, and retail stores. A hidden set screw allows for the "tighten and forget it" approach. Stainless steel is rust resistant, and heavier than aluminum. Another benefit to the sign fixing that is the silver finish, in which enhances signage panels.

Comes with Cap, Barrel, #6 x 1 1/4" screw and drywall anchor.

3/4" D x 3/4"

Screw Caps

Screw caps give wall-mounted signs a complete look! These screw cap covers called fasteners, or screw heads stand slightly above a signs surface. The 1/4" thickness of the screw covers provides a more deluxe style than a completely flat screw cap covers hold signs securely in position. We supply these screw cap covers with all the hardware needed to fully mount a sign with pre-drilled holes. Available in satin silver finish.

Comes with Cap, Threaded O Rings, #6 x 1 1/4" screw and drywall anchor.

Terms & Conditions

We accept payments in the following methods.

Cash, Major credit cards; Visa, Mastercard, Discover, and American Express; COD, Approved Credit Net 30 days and / or Payment in Advance.

Phone Orders.

Order hours are Monday –Thursday, 8 am – 5 pm; Friday 8 am – 4 pm. Charlotte Area may call the Midland, NC branch at 800-230-7668 or 704-888-0604. Myrtle Beach Area may call the Conway, SC branch at 888-221-8321 or 843-365-9921

Fax/Email Orders.

We accept fax orders anytime at 704-888-1144 (NC) or 843-365-9927 (SC). Orders may be emailed to a Sunbelt representative, please speak to representative to obtain email address.

Shipping – We Ship Nationwide.

We will make every effort to ship all UPS orders called in before 1:00 pm the same day. For cut to size orders, please allow additional time for cutting. Freight shipments called in before 12 pm will ship same day.

Custom Routing.

We will rout jobs in the order they are received. Please allow at least 2 business days to complete a job. A DSF or PDF file is required via email to use as a template to rout the job to your specs.

Customer Pick Up.

8 am –5 pm, Monday – Thursday; 8 am – 4 pm Friday

Delivery Service.

We offer a delivery service to our local customers and our routine truck customers for a small fee. All orders of \$100.00 or more will be prepaid. Customers over a 60 mile radius will be subject to an up-charge for delivery. Please call for delivery schedule and fees (if applicable).

Freight Shipments.

All freight shipments FOB Midland, NC and Conway, SC. Customers will be charged a minimum freight charge.

Prices.

Prices are subject to change without notice. All pricing FOB ship point.

Warranty.

We will honor the manufacturer's technical evaluation of material and under no circumstances will be responsible for claims beyond the replacement value of the defective product. We are not liable for consequential or incidental damages. All credits will be issued when we receive credit from the supplier.

Returns.

All returns must be accompanied by prior written approval. Returns will be issued a return authorization number and will be picked up by Sunbelt or returned by the customer. Sunbelt must have an invoice number and date of purchase to approve the return. Sunbelt will not be responsible for any returns without proper authorization. Items must be returned within thirty (30) days of invoice date and are subject to a 25% restocking fee.

Damaged Goods.

Orders delivered by Sunbelt require a signature of received goods. This signature signifies material has been received in good condition. Material shipped by common carrier that shows signs of damage must be filed with that carrier. Sunbelt will not be responsible for material damaged by common carriers.

Special Orders.

All special order non-stock items may not be returned or cancelled.

Return Check Policy.

There will be a \$30.00 charge for all returned checks.

We value our relationships that we build with our customers; and our commitment lies in the complete satisfaction of each product and service we sell. Sunbelt Sign Supply is privileged to be your supplier, and your loyalty is greatly valued.
